

## First Baptist Church of Brandon Brandon, FL

- Completed in July, 2000
- Six ERVMAX units w/ E-Coil technology
- New system EER of 14
- Energy savings of over 60%

An existing 40-ton chiller (30 years old) was replaced with seven new York heat pump systems that were retrofitted with ERVMAX units and E-Coil technology. The retrofit technology allowed for 20% capacity downsizing in the new equipment and an overall system EER improvement from 5 to 14. A comparison between the prior cost of operation and the new cost of operation showed an energy savings of over 60%.
