

ERVMAX RETROFIT CASE STUDY

Forest Hills Post Office Tampa, FL

- Completed in May, 1999
- Eight ERVMAX units w/ E-Coil technology
- Total combined system efficiency increased 76%
- Total power reduction of 35%

Eight HVAC systems at the post office and vehicle maintenance facility were retrofitted with ERVMAX units and E-Coil technology. In addition, compressors and blower motors were replaced and downsized. These changes resulted in an overall capacity increase of 16%, power reduction of 35%, and an efficiency improvement of 76%. Similar projects were implemented at other post offices in the Suncoast District.
