

ERVMAX RETROFIT CASE STUDY

MacDill Air Force Base Tampa, FL

- Completed in May, 2000
- Five ERVMAX units w/ E-Coil technology
- System efficiencies increased an average of 75%
- Energy savings of over 40%

Existing Carrier package units were retrofitted with ERVMAX and E-Coil technology. In addition, compressors were replaced and downsized. These changes resulted in an average system efficiency increase of 75% and energy savings of over 40%.
